SUPERIOR - Service. Innovation. Technology.

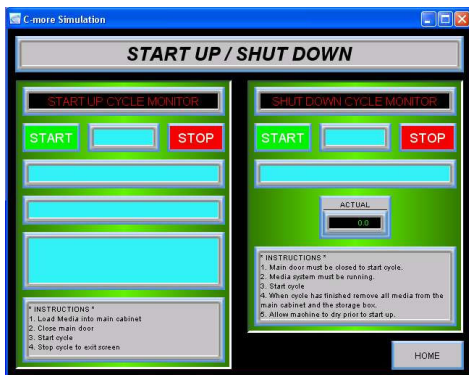

Control System Upgrade

Leonard Enterprises, Inc. is now offering control system upgrades. We are currently offering three levels of upgrade.

- **Level 1**—The level 1 upgrade is a basic upgrade of the control system program to incorporate new functions that have been developed in the past two years. These include—better informational displays, one button start-up/shut-down procedures and auto idle cycles. Plus more customer changeable settings.
- **Level 2**—the level 2 upgrade is a mid level upgrade of the control system. This would include touch panel and PLC upgrade to state of the art systems. This system also includes the new programming.
- **Level 3**—The level 3 upgrade is a complete overhaul of the entire control system. This includes AC drives, touch panel, PLC, and safety systems.

LEI offers many different manufacturers of PLC and touch panel. Any requests are welcome. Just give us a call with all of your questions. We will be happy to accommodate your wishes.
